

To whom it may concern;As an xm radio subscriber, I should not have to worry about sensorship. Since I have had xm radio I have not listerned to a FM station, THAT IS BY CHOICE! I choose to pay for this service as I choose to listen to it, I should not be told what I can and cannot hear on it. Please deny the NAB's petition 04-160. If they want to keep their listerners then they need to provide programming that keeps the interests of the listerners.
